

ER-diagram of hospital

Krátký popis projektu:

Entity: nemocnice, místo konání, operační sál, lékař, asistent, pacient, operace, vstupenka (elektronická, papírová)

Vztahy mezi entitami jsou:

1. Hospital connected to entity Venue by location
2. Hospital connected to operation room by hall
3. Hospital connected to doctor by workplace(position, salary)
4. There are 2 types of med staff: doctor and assistant
5. Doctor has 2 identificators
6. Doctor connected to operation room by preparation
7. Patient connected to ticket by order
8. Paper and electronical are child of ticket
9. Ticket connected to operation by waiting

Operation is weak entity type, because it can't exist without patient, doctor, hospital.

Only 1 operation in one of operating rooms
